

SEH Whitepaper: One Step Beyond Bar-Code Printing

Smart
Solutions

Network
Printing

Enterprise-wide, unified bar-code printing in combination with optimized core network tasks for printing and spooling. Exactly what SEH's Print & Spooling Appliance *ISD300* and *TEC-IT's TBarCode/Embedded* stands for.

The *ISD300* is a highly efficient, out-of-the-box spooling device. In combination with *TEC-IT's* bar-code software *TBarCode/Embedded* users take advantage of completely device independent bar-code printing - yielding the first universal boxed bar-coding solution available on the market.

TBarCode/Embedded turns each Postscript- or PCL printer connected to the *ISD300* into a bar-code enabled output device. This solution is maintenance free, offers full bar code support and is available for SAP R/3, too – but all this without per printer costs, without hardware dependencies, without forced hardware replacements due to model changes.

ISD300 and *TBarCode/Embedded* are installed within minutes – even in large company networks. Printing and bar-coding in a completely transparent manner - no matter which printers or operating systems are in use.

At a glance

- Enterprise-wide bar-code solution
- Unified bar-code handling
- Device and printer-model independent
- Plug and Play Barcode Printing
- No special Sys-Admin Knowledge required
- No printer upgrades required
- No per-printer costs

TBarCode/Embedded

- Supports Postscript and PCL-printers.
- Support of 1D and 2D bar-codes (70+ different bar-code symbologies)
- Industry standard compliant bar-code printing
- No unwanted side-effects on legacy documents
- Integrates seamless into leading ERP-applications.
- TBarCode/Embedded comes with predefined SAP R/3 device types

Features ISD300

- Central, efficient management of all print jobs and queues in the network
- Many job management options: Prioritising, deleting, halting, re-routing to alternative queues, etc.
- Many queue management options: Setting up balance and copy queues, blocking queues, etc.
- May be used as a platform for third-party filter applications (e.g. barcode printing solution)
- 3 years manufacturer's guarantee
